VLAD TARBA

STUDENT AT ROC ALMERE BUITEN

EDUCATION

OBS DE ONTDEKKING

This is where I obtained my basic thinking and logical skills.

2012-2020

HELEN PARKHURST

This is where I obtained my MAVO diploma and followed HAVO classes for half a year.

2021-2025

ROC ALMERE BUITEN

Here I follow Software Development classes. I followed an accelerated English class and finished that subject early.

2025 - present

EXPERIENCE

From 2023 until 2024 I've been an intern at NEDROM TECH B.V. As of November 2025 I've been hired as a part time electrician and software developer. I've built a huge knowledge base for handling EV Charging stations and know the basics of such.

HOBBIES

- Guitar
- Gaming and coding
- Listening to music

ABOUT ME

I am Vlad. Born on the 29th of October, 2008, I came to the Netherlands at a very young age. I'm well spoken in both English and Dutch. I'm always curious for new information and retain information from others well.

SKILLS

Social skills:

Generally speaking I see myself as a fairly relaxed individual. I do get nervous at times, but I try my best to keep my composure. I am able to focus well when I know what my tasks are and am quickly glued to finish my work before I move on to the next objective.

I'm a logical and critical thinker, and ask others for help when I don't understand certain things. I try my best to be as friendly and respectful to others, especially to people that lend help towards me.

Software skills:

I have basic knowledge in a variety of coding languages, such as C#, C++, CSS, HTML, PHP and MySQL. I learn a lot of it from school, and it teaches me how to handle game- and web applications of the present.
